Lowest Price

SVI's efficient and affordable 36 Dollar 360 offers fully customizable competencies and on-demand downloading of reports for as little as \$36 per report.

The 36 Dollar 360 keeps track of the cumulative number of reports you purchase for your organization under a single account. Once you cross any of the report volume thresholds that separate our plans, you are automatically upgraded to the corresponding plan and receive the designated discount pricing for all future report purchases. Pretty cool, huh?

Easiest to Use

The 36 Dollar 360 web-based administrative dashboard makes customizing and launching 360-degree multi-rater feedback surveys a breeze. It provides:

- Easy-to-follow prompts and automated features; you don't need any technical expertise to operate it.
 - Proven competency models to choose from, or you can easily input your own.
 - SingleSurvey™ technology, so raters can evaluate multiple targets at the same time.
 - Automatic save so you don't lose any data.
- The 360-degree assessment process has never been this simple!

Most Broadly Deployable

Because of the sheer time and expense, 360-degree assessments have been reserved primarily for top-level managers in mid-sized to large global organizations. The 36 Dollar 360 relieves the pain of cost-prohibitive systems - it's a truly scalable multi-rater reporting system. Finally, it's easy to develop everybody.

Getting Started

After you sign up, you can choose a built-in competency model or enter your own. Then upload and organize an unlimited number of raters. You can purchase report credits when you're ready to launch your 360-degree assessment. Your account's credits never expire - simply use them when you need them.
